PRODUCT TECHNICAL DETAILS

1.	Raw Material Used for casting	Brass ingots Grade CuZn38Pb2												
2.	Faucet Body / Concealed valve Testing	<ul style="list-style-type: none"> The casted bodies and valves are tested at 14 to 18 kg/cm² hydrostatically. Each faucet is being checked hydrostatically at the pressure of 5 to 7 kg/cm² post assembling. All concealed valves are pneumatically tested at a pressure of 3-5 kg/cm². 												
3.	Electro Plating	<ul style="list-style-type: none"> Nickel thickness 12 - 15 μm Chromium 0.3 - 0.6 μm 												
4.	Anti-corrosion Test pass in hours (Sault Spray Test)	<ul style="list-style-type: none"> 120 hours 												
5.	Single Lever Cartridge Size	<ul style="list-style-type: none"> Ø 35mm Ø 40mm Ø 46mm & Ø 56mm 												
6.	Ceramic Disc Sizes	<table border="1"> <thead> <tr> <th>Size</th> <th>¾" BSP</th> <th>M22 x 1.5</th> </tr> </thead> <tbody> <tr> <td>Diameter</td> <td>20.50 mm</td> <td>16.00 mm</td> </tr> <tr> <td>Thickness</td> <td>04.50 mm</td> <td>04.00 mm</td> </tr> </tbody> </table>	Size	¾" BSP	M22 x 1.5	Diameter	20.50 mm	16.00 mm	Thickness	04.50 mm	04.00 mm			
Size	¾" BSP	M22 x 1.5												
Diameter	20.50 mm	16.00 mm												
Thickness	04.50 mm	04.00 mm												
7.	Factors responsible for pressure reduction.	<ol style="list-style-type: none"> Size of connecting pipe. No. of bends. Height of building. Number of distribution. 												
8.	Volumetric Water Flow Rate @ 3 Bar Pressure	<table border="1"> <thead> <tr> <th>Faucet Type</th> <th>Size</th> <th>Flow Rate</th> </tr> </thead> <tbody> <tr> <td>Pillar/Bib Cock</td> <td>15mm</td> <td>12-14LPM</td> </tr> <tr> <td>Sink Cock</td> <td>15mm</td> <td>12-14LPM</td> </tr> <tr> <td>Wall Mixer</td> <td>15mm</td> <td>12-14LPM</td> </tr> </tbody> </table>	Faucet Type	Size	Flow Rate	Pillar/Bib Cock	15mm	12-14LPM	Sink Cock	15mm	12-14LPM	Wall Mixer	15mm	12-14LPM
Faucet Type	Size	Flow Rate												
Pillar/Bib Cock	15mm	12-14LPM												
Sink Cock	15mm	12-14LPM												
Wall Mixer	15mm	12-14LPM												

IMPORTED BOUGHT OUT PARTS & FORGED CONCEALED VALVES

IMPORTED BOUGHT OUT PARTS

Green Building-neoperl Make Aerators; Water Saving Aerators.

Water Saving Green Building Neoperl Make Aerators

Neoperl Make Connection Pipes

Imported Single Lever Cartridges (Maruwa)

Forged Spindles Body

Divertor Body Segment

Forged Concealed Divertor Body For Leak-proof Operation

Flush Cock 25mm with Internal Structure

Brass & S.S. Flush Valve Concealed Body

INNOVATION & TECHNOLOGY

Soft Water Flow

Brass Ingots Grade CuZn38Pb2

Higher Durability

100% Factory Tested

Operates Smoothly

Advanced Water Saving Flow Regulator

Higher Longevity

AERATORS

Devices that mix air with water to give a soft and splash-free flow.

- Our integrated honeycomb-structured aerator, provides lime buildup protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles
- The maximum allowable TDS level should not exceed 300 mg/L for the better performance of Cartridges, Aerators & Spindles.

CHROME FINISH

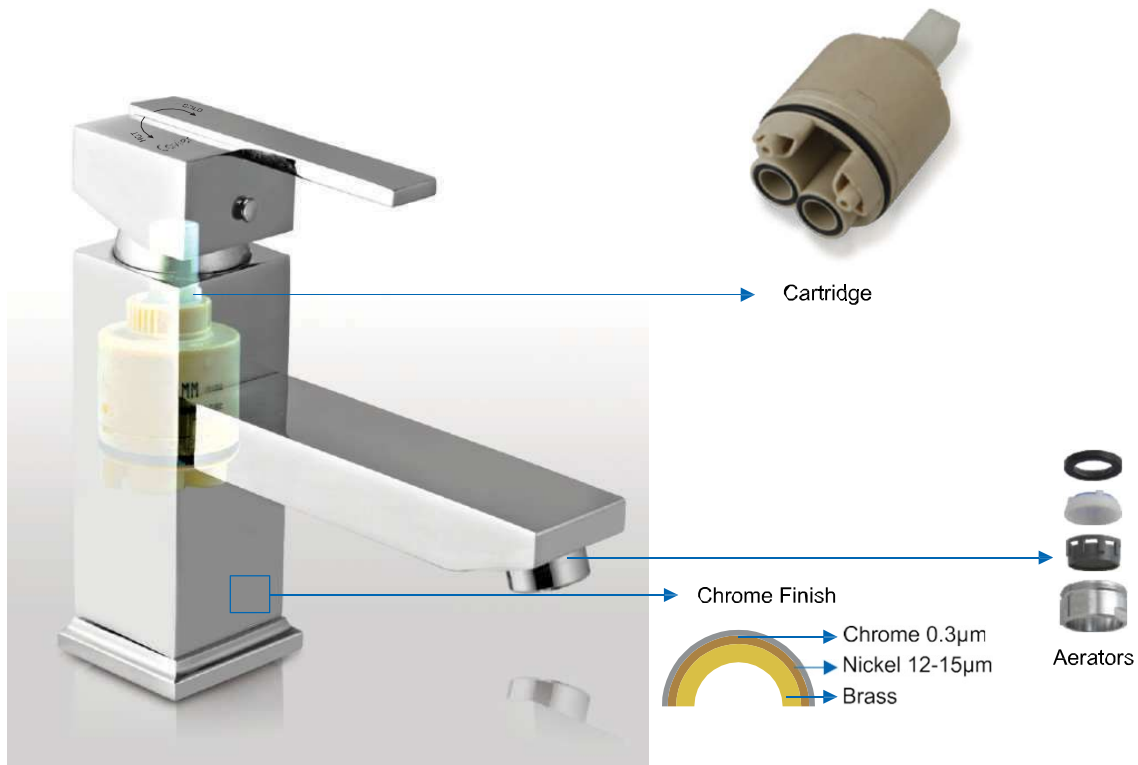

Upper shiny protection layer provides a mirror finish to every faucet.

- High plating thickness (Nickel: 12-15 microns and Chrome: 0.3 microns) provides tolerance to extreme climate and water conditions
- 72+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer duration.

CARTRIDGES

The heart of every faucet, the cartridge is responsible for controlling water supply.

- cartridges are 5 lacs cycle tested to give a longer and trouble free operating life of upto 20 years (considering 60-70 operations per day)
 - Wide angle of lever provides ultra comfort and flawless, smooth operation
 - Our cartridge spindle is made of brass instead of plastic, to avoid breakage
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5 -5 bar)

LEAD FREE

LEAD-FREE FAUCETS

Lead-free faucets can reduce the potential of lead in drinking water and the adverse health effects associated with lead exposure.

LEAD-FREE ACT

The reduction of Lead in Drinking water Act was signed into law on January 04, 2011 and was implemented on January 04, 2014. Lead free refers to <0.25% weighted average lead content in relation to wetted surface of pipe, fittings, and fixtures in systems delivering drinking water for human consumption. This is also known as Safe Drinking Water Act.

THE DANGER OF LEAD

Infants and children are the most affected with consuming the water containing excessive lead. This can lead to experience delayed physical and mental development, while adults who consume it could develop kidney problems or high blood pressure. For as far as we know, lead fulfils no essential function in the human body, it can merely do harm after uptake from food, air or drinking water.

**All products carry 10 years warranty
against any manufacturing defects.**

- Lifetime Warranty on selected series
- To keep the chromium plating intact,
regularly wipe the faucets with soft cloth and use soap
if required to avoid the white deposits (i.e. scaling)
- Do not use any cleaning agent which contains Hydrochloric acid, Formic acid,
Phosphoric acid, Acetic acid, Chlorine bleaching substances.
- Never use any Abrasive material, Scouring pads for cleaning the faucet.
Use only soft cloth for wiping
